

Depositional Environments, Landforms, and Waterforms

Practice Questions

Instruction: Select the letter of the correct answer for each question below.

1) These are bodies of water that originate from mountains or hills and flow down to mountain slopes or plains.

- a) lakes
- b) oceans
- c) rivers
- d) oasis

2) Which of the following describes what an erosion is?

- a) the process of accumulating weathered earth materials materials and solidifying them
- b) the process of transporting and weathering earth materials
- c) the process of breaking down inorganic earth materials into smaller and simpler components
- d) the process of altering the chemical composition of rocks from its protolith

3) Marine Environment X is a low energy environment because sunlight cannot reach it. What type of Marine Environment is X?

- a) reefal
- b) Continental slope
- c) atolls
- d) deep marine

4) Which of the following depositional environments is NOT a terrestrial environment?

- a) eolian
- b) deltaic

Depositional Environments, Landforms, and Waterforms

Practice Questions

- c) lacustrine
- d) glacial

5) Which of the following depositional environments is a marine environment?

- a) continental slope
- b) tidal flat
- c) fluvial
- d) alluvial
