

Directions: Choose the letter of the correct answer.

1. Which among the following is not a driving force of evolution?
 - a. Gene Flow
 - b. Gene Pool
 - c. Genetic Drift
 - d. Mutation
2. A feature which was present and utilized well in the past but has become remnant in present-day forms of the organism.
 - a. Homologous structures
 - b. Rudimentary structures
 - c. Analogous structures
 - d. Sexual dimorphisms
3. Which among the choices are the two essential components of artificial selection?
 - a. Intrasexual and Intersexual selection
 - b. Genetic Drift and Gene Flow
 - c. Bottleneck Effect and Founder Effect
 - d. Variation and Heritability
4. Which of the following is not associated with Charles Darwin?
 - a. Pea Plants
 - b. On the Origin of Species
 - c. Natural Selection
 - d. Galapagos Islands
5. Among the following, which would satisfy the Hardy-Weinberg equilibrium?

Theory of Evolution

Practice Questions

- I. Large Population
- II. Small Population
- III. Preferential Mating
- IV. No Mutations

- a. I & II
- b. II & III
- c. I & IV
- d. II & IV
